DRUG ABUSE IN MALAYSIA

It has been 35 years since drug abuse was declared a national security problem in Malaysia in the 1980s. Back then, heroin use was the number one challenge for drug policy makers.

WHAT CHALLENGES DO DRUG POLICY MAKERS FACE TODAY?

1. Lack of clarity in the classification of drugs

   - Opiates
     - Heroin
     - Morphine
   - Marijuana
     - Hashish
   - ATS* & Methamphetamines
     - Speed
     - Meth, Chalk, Yaba
     - Syabu, Ice
     - Ecstasy
   - Benzodiazepines
     - Diazepam (Valium), Alprazolam (Xanax), Lorazepam (Ativan)
   - Others
     - Kratom
     - Inhalants (glue)
     - Depressants
     - Hallucinogens

   *Amphetamine-type Stimulants

   These are under Poisons Act 1952
   **not Dangerous Drugs Act 1952

2. Different sentencing for the same offence depending on the authority who made the arrest

   - Incarceration
     - Polis Diraja Malaysia (PDRM)
       Section 15(1)(a) of Dangerous Drugs Act 1952
   - Treatment & Rehabilitation
     - Agensi Anti-Dadah Kebangsaan (AADK)
       Section 6(1)(a) or Section 8(3)(a) of Drug Dependants (Treatment & Rehabilitation) Act 1983
   - Supervision
     - PDRM / AADK
       Section 6(1)(b) or Section 8(3)(b) of Drug Dependants (Treatment & Rehabilitation) Act 1983

Please note that the laws listed above relate to drug use only.
3. Most drug-related arrests by PDRM are for consumption

Majority of drug-related arrests by PDRM are under Section 15(1)(a) of Dangerous Drugs Act 1952 for consumption / self-administration

4. Number of arrests by AADK has steadily increased

AADK has witnessed a steady increase in the number of drug dependants between 2013 - 2017

Source: Maklumat Dadah 2016

*i term used by AADK is on the premise that each drug user arrested and charged by AADK has a dependence on drugs
5. There is an increase in the prevalence of drug use for almost all age groups

Prevalence of drug use has been steadily increasing over the years and is evident in almost all age groups.

---

6. Use of Amphetamine-type stimulants (ATS) has overtaken use of opiates

Amphetamine-type stimulants (ATS) are increasingly becoming the main drug of choice, overtaking opiates.

---

Based on National Health and Morbidity Survey 2017 on Adolescent Health, the prevalence of Form 1 to Form 5 students who had ever used drugs in their lifetime was 4.3%, which is 2.5 times higher compared to the Global School-based Student Health Survey in 2012 (1.7%).
7. Keeping an offender in an institution is costly

<table>
<thead>
<tr>
<th>Cost of keeping an offender</th>
<th>RM 20,690* annually</th>
</tr>
</thead>
<tbody>
<tr>
<td>in prison</td>
<td></td>
</tr>
<tr>
<td>Cost of keeping an offender</td>
<td>RM 38,530**</td>
</tr>
<tr>
<td>in compulsory rehab</td>
<td></td>
</tr>
<tr>
<td>Cost of keeping an offender</td>
<td>RM 5,340* annually</td>
</tr>
<tr>
<td>under supervision and</td>

AADK is only legally allowed to keep an offender in their institutions for treatment and rehabilitation if the drug abused falls under the Dangerous Drugs Act 1952.

IDEAS TO ADDRESS DRUG ABUSE IN MALAYSIA

1. Introduce an early warning system to monitor emergence of new drugs
2. Strengthen data collection for better estimates of drug use
3. Inform and educate to address stigma surrounding drug use and addiction
4. Develop professional capacity to support long term treatment
5. Review treatment effectiveness of court-mandated incarceration and rehabilitation
